

The logo for 'lovedécor' is centered on a light pink rectangular background. The text 'lovedécor' is written in a white, lowercase, sans-serif font. The 'd' is notably larger and bolder than the other letters. The entire logo is set against a dark teal background that features decorative marble patterns in the corners and along the bottom edge.

Our

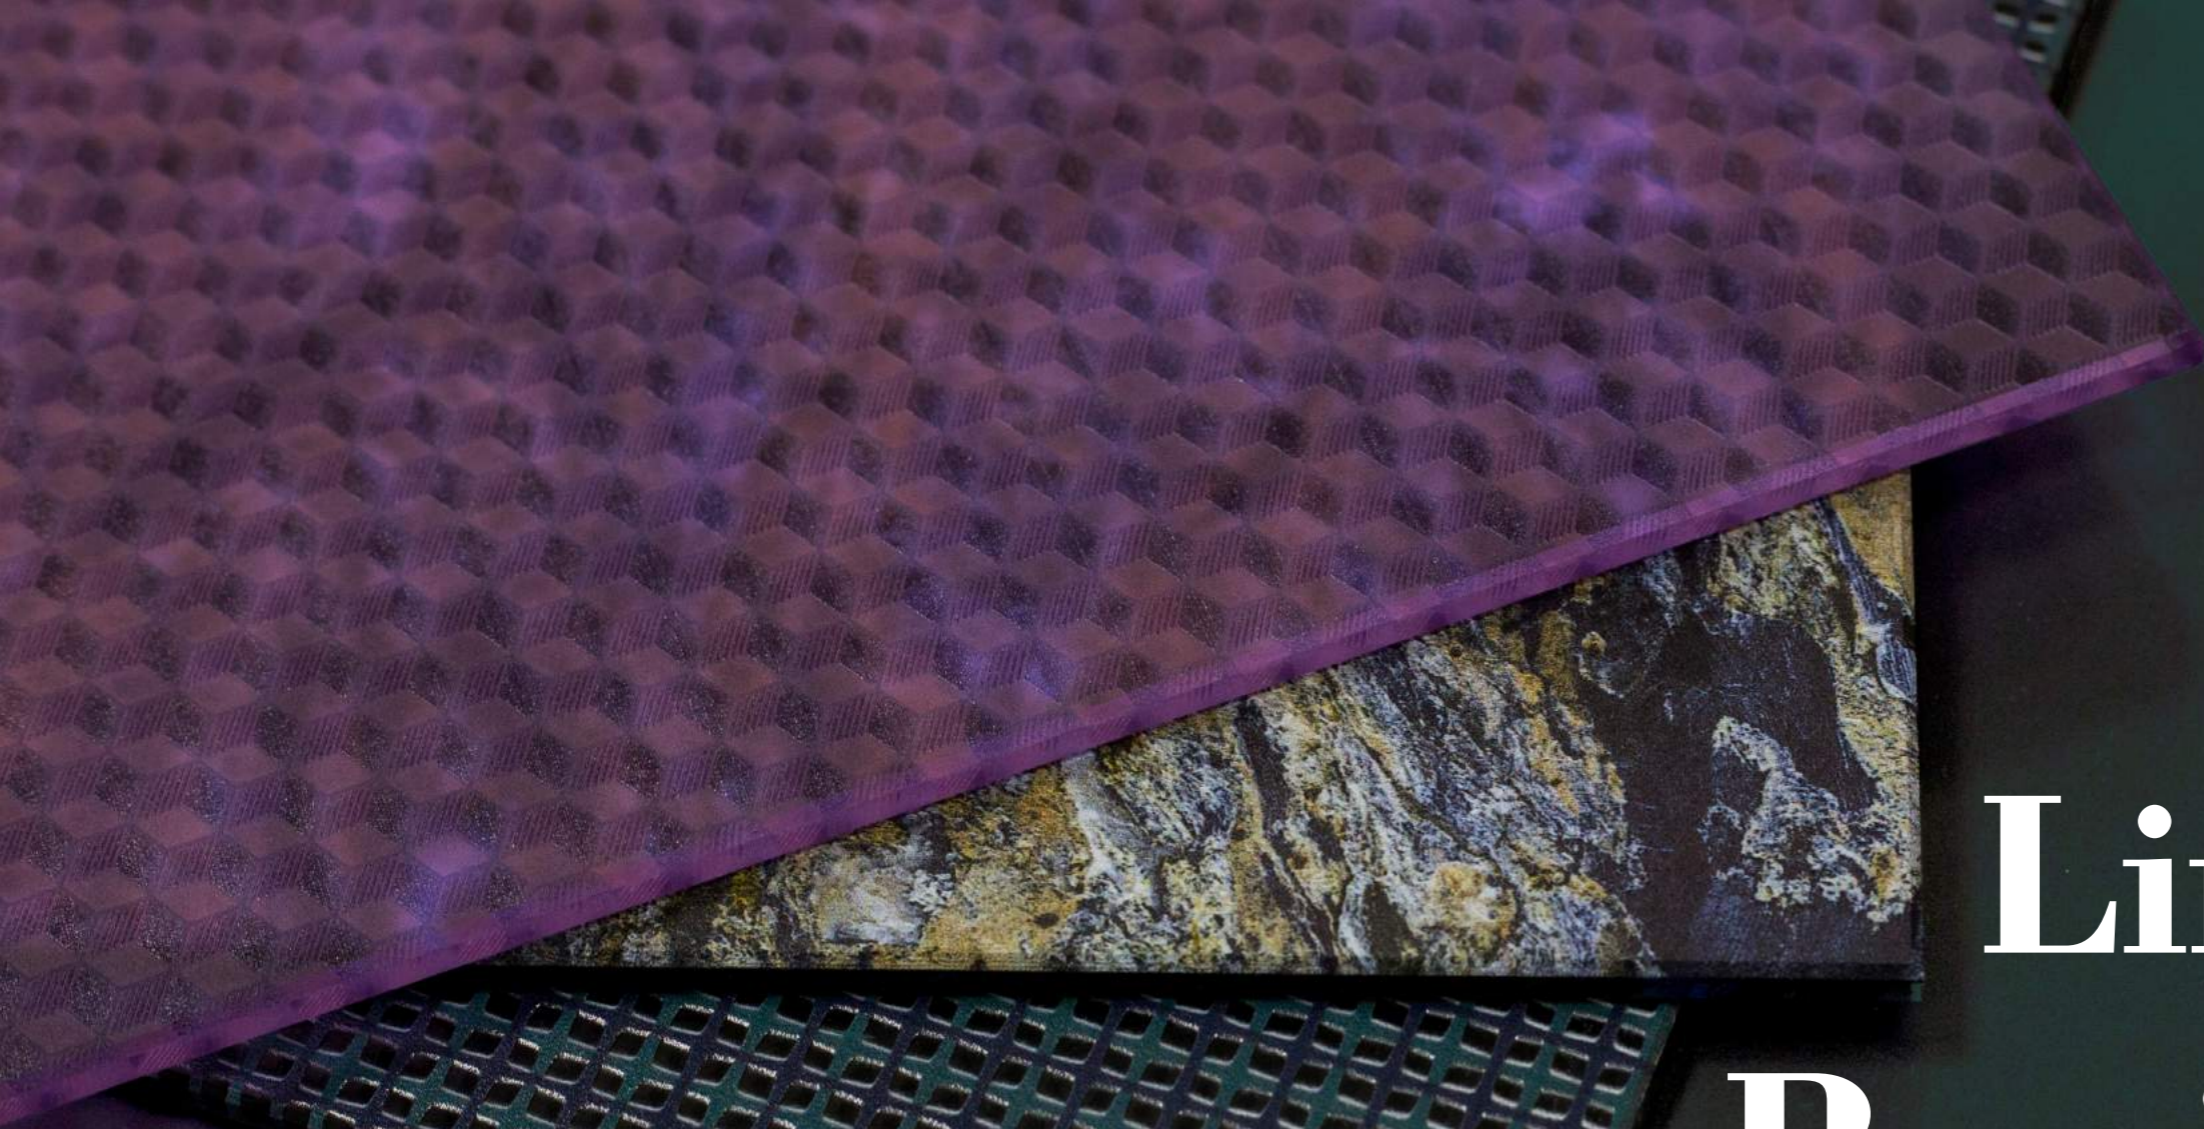

Story

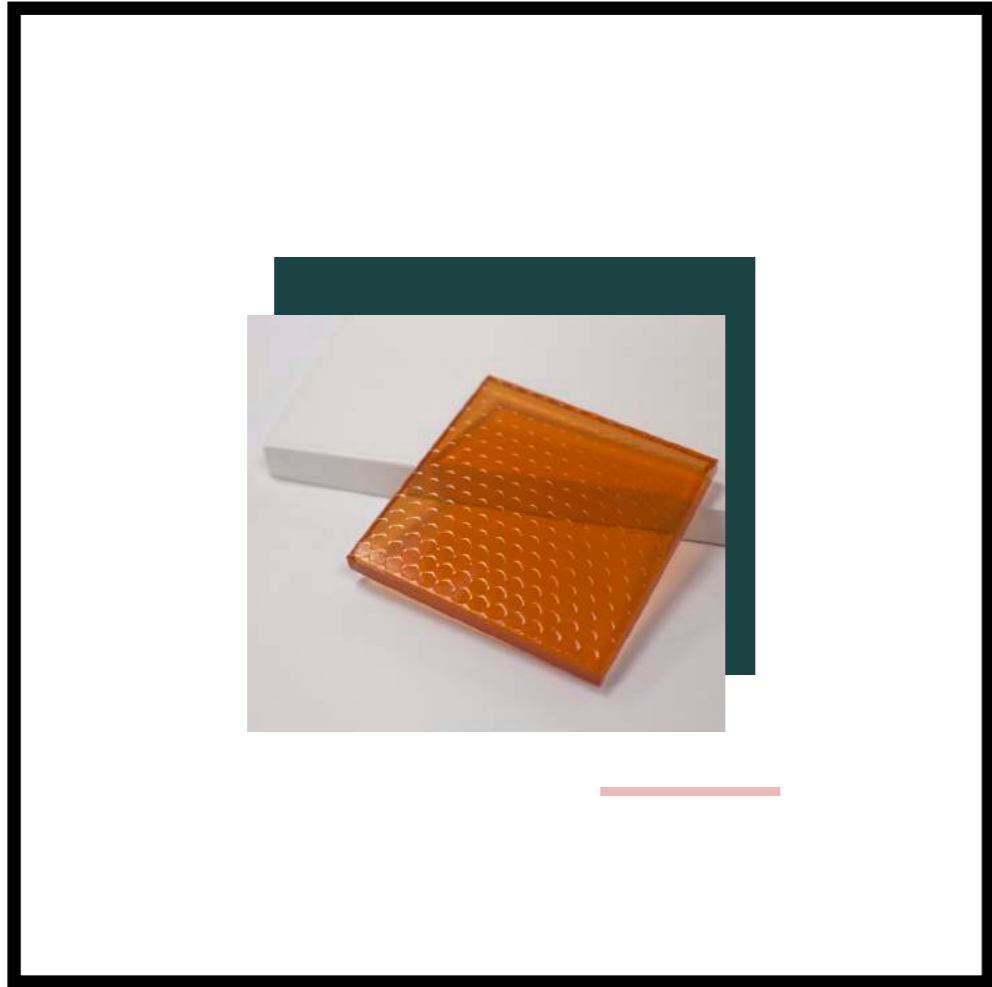

lovedécor

At Love Décor we create customised interiors using specialist printing techniques and high quality materials allowing interior designers and architects the faculty to deliver unique concepts to clients with imagination being the only limit!

Our Empiezo Collection is designed to inspire and illustrate what can be achieved on glass, acoustics, wallpaper and fabric tailored to each brief. We work with trusted brands like Vescom, 3M, Rockfon and many more to customise and personalise their products and ranges in different materials.

**Limitless
Possibilities**

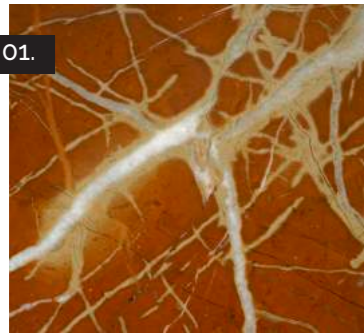

lovedécor

Love Décor's professional design service helps you through the entire production process, from concept to finished product. Love Decor offers endless possibilities to translate your ideas into beautiful bespoke pieces, perfectly suited to enhance any interior, whether it's in the residential sector, hospitality industry, office, retail or education sector.

Our in house studio of experienced designers and production experts work together with you to add a

distinctive stamp to any interior. Our production team continuously explore new production processes and methods to express creativity and design in a wide range of materials. Our niche and specialist printing machinery allow us to evolve our products and meet your client's ever changing briefs.

Product Specification

Glass

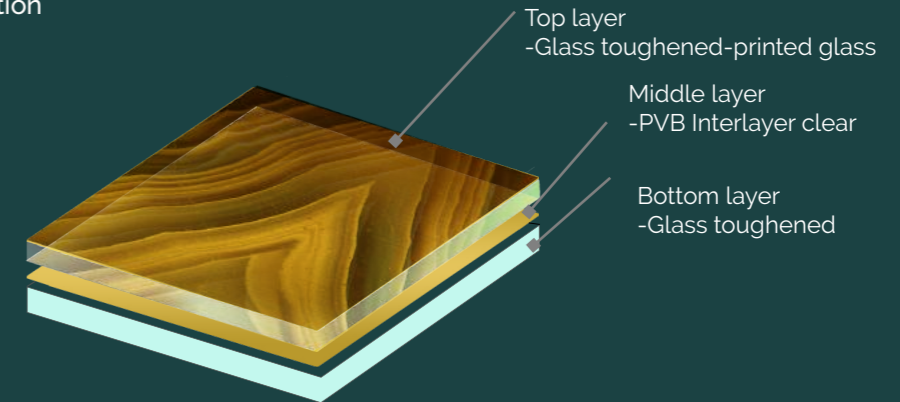

Love Décor's feature glass range is a combination of glass and aluminium in two separate layers laminated together to create a unique surface with reflective elements and depth.

The low iron toughened glass is treated so the inks adhere to the glass permanently. The rear of the glass is printed in specific areas and other areas of the glass are left transparent.

The aesthetic effect of multiple layers within the glass is particularly effective when key areas of the images need to be highlighted.

The panels can be used inside buildings for residential & commercial settings, enabling architects, interior designers and shop fitters to implement creative design ideas combined with functional purposes.

Product Specification

Product Specification

Front Layer	Glass toughened low Iron Opti white
Surface Finish	Smooth
Thickness	6 mm
Colour	Transparent
Weight	15kg per m2
Rear Layer	Aluminum composite AlMg1 alloy with per core
Colour	Gold Mirror
Surface Finish	Smooth
Thickness	3mm
Weight	6.5kg per m2
Corrosion	UV – protection. No delamination or warping due to low thermal expansion.
Combined Thickness	10.5mm
Application Method	Tech 7 or stainless steel trim support system top and bottom.
Maximum Panel Size	3m x 1.2m

Product Characteristics

These are typical values for Love Décor feature glass laminate range. Customisation available upon request.

Product Specification

Vescom Fabric

Vescom Fabric stands for high quality, when it comes to technology, styling and service. Products produced by Vescom are used on the contract market. Mainly in the hospitality, healthcare, office and education market segments.

There is a growing need for beautiful, rich and attractive interior products within these markets where the functionality of the products is of vital importance. The wallcovering, upholstery and curtain fabric collections meet the high-quality requirements that are set by the contract market. This concerns, for example, fire retardancy, applicability, lightfastness and wear-resistance.

Product Specification
